IS CANIF		

**The ORE offer is only available to Railway Undertakings*

Applicants for capacity may receive, free of charge, a minimum of ten authorisations for the so-called Minimum Service Applications, then one additional free authorisation for each 150,000 train-km based on their annual traffic forecasts (excluding ARTIC and DOC EXPLORE, for which the ceiling remains at 10 regardless of traffic volumes; excluding TCAP, for which the maximum limit is set at 80 free authorisations), with an adjustment — upwards or downwards — of the number of additional free authorisations based on the train-kilometre volumes actually achieved during timetable A (the SI fees relating to timetable A being invoiced at the beginning of year Y+1).

By way of derogation, no downward adjustment of the number of free authorisations shall be applied in the event of exceptional long-term events having a significant impact on traffic, such as large-scale industrial action.

In the absence of an actual train path order or traffic within two timetables from the Expression of Needs 24h/train path order, the provisions of Article 11 §4 of Appendix 3.4.1 shall apply.

The fees for access to the Applications, beyond the free services, are presented in the table in the following section, 'Additional IT Services'.
