Artic		10									
SIPH Consultation		15	30	45	60	75	90	98	105	120	135

Candidates without any traffic circulating in N-1 (new arrivals, restarting activities, etc.) may benefit from minimum services in N based on their duly justified traffic forecasts, with adjustment (upwards or downwards) according to real traffic data in the event of a discrepancy. In the event of a lack of any train path orders, article 11§4 of the IS GC will apply.

In the case of an exceptional event of long duration that has a major impact on volumes of traffic (such as large-scale social movements), the train-km volumes taken into account will correspond to those generated during the Y-2 timetable (N.B. and not those from Y-1, as usual).

In order to take account of the health crisis, the train-km volumes applicable for each candidate for the 2022 timetable correspond to the highest train-km volumes invoiced for the 2019 timetable and the 2021 timetable. For candidates who did not travel during these two timetables, the standard system applies.

IS Service	Trains /Km	Maximum number of accesses per IS (information system) service included in the minimum services (for the timetable)									
		from 0 to 0.8 M.	from 0.8 to 8 M.	from 8 to 20 M.	from 20 to 50 M.	from 50 to 100 M.	from 100 to 200 M.	from 200 to 340 M.	from 340 to 380 M.	from 380 to 600 M.	> 600 M.
e-Houat		20	30	90	210	450	900	1800	2400	3000	4200
e-Bréhat		24	48	144	336	720	1440	2880	3840	4800	6720
See-trains		20	40		70	150	300	600	800	1000	1400
DECLIC		10	20	36	84	180	360	720	960	1200	1680
DELTHA		20	30	90	210	450	900	1800	2400	3000	4200
DINAMIC		20	40		70	150	300	600	800	1000	1400
Durandal 2		30		100	220	690	1350	3000	4000	5000	7000
Regularity Observatory		10	20	36	84	180	360	720	960	1200	1680

Candidates without any traffic circulating in N-1 (new arrivals, restarting activities, etc.) may benefit from minimum services in N based on their duly justified traffic forecasts, with adjustment (upwards or downwards) according to real traffic data in the event of a discrepancy. In the event of a lack of any train path orders, article 11§4 of the IS GC will apply.

In the case of an exceptional event of long duration that has a major impact on volumes of traffic (such as large-scale social movements), the train-km volumes taken into account will correspond to those generated during the Y-2 timetable (N.B. and not those from Y-1, as usual).

In order to take account of the health crisis, the train-km volumes applicable for each candidate for the 2022 timetable correspond to the highest train-km volumes invoiced for the 2019 timetable and the 2021 timetable. For candidates who did not travel during these two timetables, the standard system applies.

Additional IS services

IS services access charge (additional services)

IS Service	Procedure for calculating the charge	Unit price in Euros (ex. VAT)
Doc.Explore, GESICO, DSDM, Ischia, e-Houat, e-Bréhat, GESICO/DSDM	Price per timetable and per additional access (see threshold defined in the table above)	595,70
DECLIC	Price per timetable and per additional access (see threshold defined in the table above)	347,09
See-trains	Price per timetable and per additional access (see threshold defined in the table above)	1 072,23
OLGA	Price per timetable and per additional access (see threshold defined in the table above)	94,42
TCAP	Price per timetable and per additional access (see threshold defined in the table above)	6 748,09
ARTIC	Price per timetable and per additional access (see threshold defined in the table above)	1 562,91
DINAMIC	Price per timetable and per additional access (see threshold defined in the table above)	1 370,24
Gaïascope - basic service	Price per timetable and per additional access (see threshold defined in the table above)	1 918,49
Gaïascope - additional module	Price per timetable and per access (in addition to the basic service)	618,91
OGS	Price per timetable and per additional access (see threshold defined in the table above)	185,86
Gaïascope Mobile	Price per timetable and per access	48,45
DELTHA	Price per timetable and per additional access (see threshold defined in the table above)	278,73
DURANDAL 2	Price per timetable and per additional access (see threshold defined in the table above)	138,18
GOST	Price per timetable and per additional access (see threshold defined in the table above)	617,53
SIPH Consultation	Price per timetable and per additional access (see threshold defined in the table above)	1 222,37
SIPH Etudes	Price per timetable and per access (including cost of purchasing TPS licence)	13 667,40
Infra SIPH	Price per timetable and per access	75 343,06
Regularity Observatory – basic service	Price per timetable and per additional access (see threshold defined in the table above)	131,00
Regularity Observatory – supplementary module (ad hoc reporting)	Price per timetable and per access (on top of basic service)	167,00
EPSICO	Made available free of charge	Free
Atlas Digital Works	Made available free of charge	Free

Access charge per IS services flow (additional services)

Price per Timetable and per IS flow	Trains /Km									
	from 0 to 0.8 M.	from 0.8 to 8 M.	from 8 to 100 M.	from 100 to 200 M.	from 200 to 300 M.	from 300 to 340 M.	from 340 to 380 M.	from 380 to 500 M.	from 500 to 600 M.	> 600 M.
GESICO Webservice	500,00	1 000,00	1 500,00	2 000,00	3 000,00	4 000,00	4 500,00	5 000,00	6 000,00	7 000,00
DSDM Webservice	500,00	1 000,00	1 500,00	2 000,00	3 000,00	4 000,00	4 500,00	5 000,00	6 000,00	7 000,00

Candidates without any traffic circulating in N-1 (new arrivals, restarting activities, etc.) may benefit from minimum services in N based on their duly justified traffic forecasts, with adjustment (upwards or downwards) according to real traffic data in the event of a discrepancy. In the event of a lack of any train path orders, article 11§4 of the IS GC will apply. In the case of an exceptional event of long duration that has a major impact on volumes of traffic (such as large-scale social movements), the train-km volumes taken into account will correspond to those generated during the Y-2 timetable (N.B. and not those from Y-1, as usual). In order to take account of the health crisis, the train-km volumes applicable for each candidate for the 2022 timetable correspond to the highest train-km volumes invoiced for the 2019 timetable and the 2021 timetable. For candidates who did not travel during these two timetables, the standard system applies.

Access charge per IS services flow (additional services)		
IS flows	Procedure for calculating the charge	Unit price in Euros (ex. VAT)
DINAMIC Webservice - module for declaration of real consist of trains	Price per timetable and per volume of data consumed (number of calls to the webservice)	Not invoiced
Gaia Flow	Price per timetable and per volume of data consumed (number of messages disseminated by the service)	0,01
DANC Flow	Price per timetable and per notice of non-compliance	0,32
Train Path Flow	Price per timetable and per volume of data consumed (number of messages disseminated by the service)	0,06
Support for Train Path Flow connection	Price per connection for standard support Supplementary support available on quotation	1 998,54
Traffic Flow	Price per timetable and per train-km in circulation	0,00013
Support for Traffic Flow connection	Price per connection for standard support Supplementary support available on quotation	3 997,09
TCAP Flow	Price per timetable and per link line	5 124,71
ARTIC Flow	Price per timetable and per link line	5 856,82
Support for the implementation of other flows (apart from traffic and train path)	Price per connection	Ask for a quote

Ultra-fast access charge to IS services (additional services)		
Target Speed	Access mode	Unit price in Euros (ex. VAT) and per connected site *
4 Mbps	MPLS-type private network	2 245,07
20 Mbps	Specific private network (recommended for customers with a large number of users, generally over 1,500 individual users)	11 225,36

*all months begun will be owed

IS SERVICES TRAINING

Minimum services

**Maximum number of persons trained per IS service included in the minimum services
(since the start of the service, excluding international train path orders for which the number of persons trained may be reset to zero in the case of a major change of PCS)**

IS Service \ Trains /Km	from 0 to 0.8 M.	from 0.8 to 8 M.	from 8 to 100 M.	from 100 to 200 M.	from 200 to 300 M.	from 300 to 380 M.	from 380 to 500 M.	from 500 to 600 M.	> 600 M.
